CAREER OBJECTIVE

To develop my career to the highest possible level in Information Technology by working in an organization that will both effectively challenge me and make use of my experience and skills in a productive and progressive work environment

PROFILE

As a student with **computer science and IT** experience I have these additional attributes that distinguish my capabilities:

- ◆ A proactive individual with a clear sense of purpose.
- ◆ Self-driven able to work on own initiative.
- ◆ Performance oriented, and focused on delivering solutions in an effective and economic manner. Strongly quantitative, always endeavor to plan work in a manner that can be measured/assessed for performance evaluation.
- ◆ Good communication skills both orally and written, gained from communicating directly with clients, making presentations, reports and drawing business proposals.
- ◆ Multi skills and the ability to learn fast and adapt to different sectors. This is evidenced by ability to change jobs between sectors quickly grasp issues and interrelate them to provide solutions.
- ◆ Good working knowledge of analytical and problem solving skills in the IT environment and business environment gained from a wide range of work assignments.
- ◆ Possess strong team dynamic skills both as a leader and player. Ability to lead a team in achieving desired results.
- ◆ Good interpersonal and team work skills gained from working as part of a team in my working life.
- ◆ Good working knowledge of organizational and administrative skills
